FOOTHILL COLLEGE Credit Program Narrative Associate in Science Degree in Plumbing Technology

Item 1. Program Goals and Objectives

Foothill College is responding to local demand for Pipe Trades workers in Plumbing by establishing an Associate in Science degree in Plumbing Technology in partnership with the Loyd E. Williams Pipe Trades Training Center (PTTC), located in San Jose, CA. Graduates are recognized as journeypersons within the Pipe Trades industry. Graduates of the Associate in Science degree in Plumbing Technology will be employable as: as a Journeyman Commercial Plumber/Industrial Plumber, Foreman, General Foreman, Superintendent, Project Manager, Estimator, Detailer, Building Trades Inspector, Building Trades Instructor, and Union Business Agent/Business Manager. Students earning an Associate in Science degree in Plumbing Technology will increase their marketability and employment opportunities.

The Associate in Science degree in Plumbing Technology at Foothill College serves to align apprenticeship programs with college and university academic tracks as directed by the federal and state government. Foothill College and the Loyd E. Williams Pipe Trades Training Center (PTTC) are collaborating in an LEA program with the Division of Apprenticeship Standards (DAS) for the state of California.

The program learning outcomes for the Associate in Science degree in Plumbing Technology are:

- In compliance with applicable standards and codes, students will demonstrate ability to install and remove plumbing systems such as drain waste and ventilation systems, systems for various industrial fluids, public or private water systems and gas piping systems.
- In compliance with applicable standards and codes, students will demonstrate ability to maintain, extend, and/or alter plumbing systems including drain waste and ventilation systems, systems for various industrial fluids, public or private water systems and gas piping systems.

Students complete the Associate in Science degree in Plumbing Technology through enrollment in the Plumbing apprenticeship program at the PTTC. To apply to the PTTC apprenticeship program, potential students must be at least 18 years of age, be able to perform the work of the trade, present verification of high school completion, either through a high school diploma or GED or High School Proficiency certificate, and demonstrate the ability to read, write, and speak English. The selection, employment and training of apprentices by the PTTC is without discrimination according to race, color, national or ethnic origin, age, gender, religion, sexual orientation or marital status. Students are admitted into the PTTC apprenticeship program based on obtaining a passing (75%) score on the "Pipe Trades Entrance Exam,' an exam which measures the student's ability in math and mechanical reasoning. Students who pass the entrance exam are selected from an applicant waiting list, the order of which is established by the date the entrance exam was taken and the test score. Admission to apprenticeship classes is limited to apprentices registered with the California Department of Apprenticeships Standards. This limitation is authorized by the California Labor Code, Section 3074.3.

Aside from Foothill College's ordinary enrollment fees, there are no additional costs to the student to complete the Associate in Science degree in Plumbing Technology.

In accordance with the State Chancellor's office, the goals and objectives of the Associate in Science degree in Plumbing Technology align with the primary mission of California community colleges, as established in Ed. Code § 66010.4, which mandate that community colleges provide vocational instruction to students and to advance California's economic growth and global competitiveness through education and training that contribute to workforce development. The Associate in Science degree in Plumbing Technology aligns with Foothill College's Institutional Outcomes and directly supports the Computation and the Creative, Critical, and Analytical Thinking rubrics.

Item 2. Catalog Description

The apprenticeship program, which includes coursework, lab work and on-the-job training, involves learning about the assessment, installation, maintenance, and repair of different types of pipe systems, effective and safe tool use, material applications, related mathematics & science and storage. The student will learn how to read blueprints, apply layout and install, as well as estimate and repair both supply and waste water systems. The Associate in Science degree in Plumbing Technology builds on the Certificate of Achievement in Plumbing by adding requirements for general education courses and electives offered at Foothill College.

The Associate in Science degree in Plumbing Technology program is conducted in partnership with the Pipe Trades Training Center apprenticeship program. The apprenticeship program is five years in duration, requiring a minimum of 9,000 hours of on-the-job training. After 5 years of classroom and paid work experience, students are recognized as journeypersons within the Pipe Trades industry, working to protect the health and safety of the community by piping pure water to commercial and industrial buildings for drinking, cooking, washing, cleaning, manufacturing or personal use, and removing waste water after it has served its purpose. A graduate will be prepared to work as a Journeyman Commercial Plumber/Industrial Plumber, Foreman, General Foreman, Superintendent, Project Manager, Estimator, Detailer, Building Trades Inspector, Building Trades Instructor, and Union Business Agent/ Business Manager in a variety of industries including the energy, biopharmaceutical, healthcare, aerospace, construction, housing, water treatment, and food and beverage processing industries. Labor Market Analysis indicates increased employment opportunities in the Pipe Trades through 2020. Students earning an Associate in Science degree in Plumbing Technology will increase their marketability and employment opportunities. Admission to apprenticeship classes is limited to apprentices registered with the California Department of Apprenticeships Standards, according to the California Labor Code, Section § 3074.3.

Item 3. Program Requirements

	Dept. Name				IGET	AND SOME CONTROL OF THE REAL PROPERTY.

	APPT 129	Special Topics	2.5	NA	NA	Year 5, Spring & Summer
	APPT 130	Review & Turnout	2.5	NA	NA	Year 5, Spring & Summer

Required Major Total
Completion of Foothill GE pattern
Transferable electives (as needed to reach 60 units)
TOTAL UNITS

47.5 units 35 units 7.5 units **90 units**

Proposed Sequence:

Year 1, Fall & Winter = 4.5 units

Year 1, Spring & Summer = 4.5 units

Year 2, Fall & Winter = 4.5 units

Year 2, Spring & Summer = 5.0 units

Year 3, Fall & Winter = 5.0 units

Year 3, Spring & Summer = 4.5 units

Year 4, Fall & Winter = 5.0 units

Year 4, Spring & Summer = 4.5 units

Year 5. Fall & Winter = 5.0 units

Year 5, Spring & Summer = 5.0 units

Year 6, Fall = 6 units

Year 6, Winter = 6 units

Year 6, Spring = 6 units

Year 6. Summer = 6 units

Year 7, Fall = 6 units

Year 7, Winter = 6 units

Year 7, Spring = 6 units

Year 7, Summer = 3 units

TOTAL UNITS: 90 units

Associate Degree Requirements:

- English proficiency: ENGL 1A, 1AH, 1S & 1T, ESLL 26 or equivalent.
- Mathematics proficiency: MATH 57, 105, 108 or equivalent.

A minimum of 90 units is required to include:

- All Foothill General Education requirements (35 Units)
- Core courses (47.5 Units)
- Transferable Electives (7.5 Units)

Labor Market Analysis: The occupational outlook for the Pipe Trades industry shows strong demand and growth over the next ten years in Santa Clara and San Benito counties. The projected employment of Plumbers, Pipefitters, and Steamfitters is expected to grow by 29.8% in the period from 2010 to 2020. The California State Employment Development Department expects the number of professionals employed in the Pipe Trades to increase from 1,190 to 2,480. The Associate in Science degree in Plumbing Technology is an important contribution in efforts to educate California's workforce and meet local demands for educated professionals in the Pipe Trades. More generally, the National Skills Coalition reported in November, 2007, that jobs in the middle of the labor market, "those that require more than high school, but less than a four-year degree" are in demand, and will remain "robust relative to its supply." See Appendix A for Santa Clara County Labor Market Information.

Advisory Committee Meeting Minutes and Member list: See Appendix B

Item 4. Master Planning

The Associate in Science degree in Plumbing Technology aligns with the planned goals of the College and the District because the program serves the regional area in support of workforce development and economic growth. The Associate in Science degree in Plumbing Technology is a new degree and does not duplicate an already-existing program within the Foothill-De Anza district or the surrounding colleges.

The only competition to the Associate of Science degree in Plumbing Technology program at Foothill College occurs from two out-of-state colleges that offer on-line degrees. PTTC apprentices and recently-graduated journeymen are taking on-line courses at Washtenaw Community College and at National Labor College at considerably higher tuition, \$194/credit hour and \$297/credit hour respectively, and other expenses in order to earn an Associate in Applied Science degree in Industrial Journeyman. Offering a Associate in Science degree in Plumbing Technology at Foothill College would well serve the college's primary stakeholders: the students, community partners, and the community at-large.

Local references in support of the Associate in Science degree in Plumbing Technology include all Advisory Committee representatives from the PTTC (Appendix B) who strongly support the partnership

between the PTTC and Foothill College due to their understanding of local economic workforce needs and their ongoing contact with apprenticeship students, which provides grounded understanding of their students' short-term and long-term educational goals.

Item 5. Enrollment and Completer Projections

		Ye	ear 1	Year 2

APPT 129	Special Projects	3	25	2	21	
APPT 130	Review and Turnout	2	25	2	18	

Item 6. Place of Program in Curriculum/Similar Programs

The Associate in Science degree in Plumbing Technology does not adversely affect existing programs at Foothill College in terms of competition for students or courses, nor does it take material resources away from other existing programs at the College. The Associate in Science degree in Plumbing Technology is designed to create pathways for students from Pre-Apprenticeship and Apprenticeship through an Associate in Science degree and potential transfer to a four-year institution. Thus, the students can easily move from the Certificate of Achievement in Plumbing to the Associate in Science degree in Plumbing Technology. This streamlined approach facilitates the students' ability to readily complete their educational goals and to earn family-supporting wages.

Item 7. Similar Programs at Other Colleges in Service Area

Foothill College's partnership with the Loyd E. Williams Pipe Trade Training Center is unique in the college service area. This degree poses no competition with other public institutions of higher education in the college service area.
