A. Re-Accreditation: does not have an option for "no previous re-accreditation", so all answers are NA and no meaningful response is possible. B5- need a "No Action Recommended" or "No Improvement Needed" response as reader feedback G2- The response doesn't give any of the data that would support the argument about the LaunchBoard being less accurate than other sources. Add some of the statistics from these other sources. Drop the parenthesis data, which is already available in each section; it wastes words that could be used make a stronger analysis of actual trends. It would help the narrative immensely. Siting other sources is great, but quote some of the data they show, even a few bits, to strengthen the explanation.

I would agree with the department that the data for this discipline is rather lacking and there are limitations to the data since actual jobs are not necessarily tied to the given TOPS code for MTEC. A. It is not clear to me that the MTEC program requires accreditation and thus, there was no need to fill out this portion of the template. B. I did not see any minutes for meetings with the advisory board. C. No explanation was provided as to why the labor demand increased. D. No explanation was provided as to why the labor supply increased. E. No explanation was required since regional wages remained the same. However, the median wage is well below the regional living wage. G. The department feels that the data provided for this part of the program review is not an accurate reflection of the actual job market in MTEC. Although more sources of data are provided by the department, I did not see any data from these sources used in this program review. F.
