

Mentor a community college student!

SLI STEM SUMMER INTERNSHIPS

SUMMER 2024

Looking for Internship Hosts!

Interested in hosting and mentoring a **local community college student** as a summer intern to support your projects while supporting their exposure to and experience in STEM?

Join the Foothill Science Learning Institute's STEM Summer Internship program as an internship host. You (or your company) will propose a 9-week project to work on with an intern, related to your research or work. Then you'll get matched with a Foothill College student, and they will intern with you for the summer from 7/8/24 - 9/6/24.

Partner with SLI to cover the student stipend!*

All students will intern part-time - either 15 or 20 hrs. This opportunity is open to individual researchers and companies or institutions willing to host a Foothill College student as an intern. This will involve a regular commitment for the intern supervisor.

To get involved:

- Review [this overview](#) to make sure you understand the expectations and commitment.
- Fill out the [Google Form application](#) by Monday, 2/27/24.
- Get matched with someone by mid-May 2024.
- Attend a program orientation and training in late May.
- The internship program starts Monday, July 8, 2024.

Sabina, Foothill intern, with Daniel, her internship mentor

* SLI asks partners to be able to cost-share or fully fund the stipends if they are able. Last summer, 75% of our partners were able to support. This helps build the program's sustainability for the future.

DEADLINE TO APPLY: Tuesday, Feb 20, 2024

Mentor a community college student!

SLI STEM SUMMER INTERNSHIPS

SUMMER 2024

Hear from previous mentors...

98% of mentors reported that they would recommend this program to their colleagues and peers.

I am a firm believer that junior college students are too often overlooked for opportunities and I would like to see more intentional prospecting in those schools in addition to four-year schools.

-Summer 2023 Mentor

“

The internship experience is amazing. I collaborated with my mentee on a statistical analysis project and performed four different types of statistical analysis. I really enjoyed being a mentor for this program and the time commitment is just right. It is really fantastic to work with Foothill internship program!

- Winter 2022 Mentor

“

It is rare to find a program that will pair you up with community college students. It was such a great experience to be a part of and I would highly recommend it without question.

- Summer 2022 Mentor

”

“

It was energizing to mentor an enthusiastic and curious Foothill student who pushed me to understand my project more deeply.
